MAIL DATE

DELIVERY MODE

06/19/2007

PAPER

Please find below and/or attached an Office communication concerning this application or proceeding.

The time period for reply, if any, is set in the attached communication.

Office Action Summary	Application No. 10/806,213	Applicant(s) LEE ET AL.	
	Examiner Paulos M. Natnael	Art Unit 2622	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on ____.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-15 is/are pending in the application.
 4a) Of the above claim(s) ____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) ____ is/are allowed.
- 6) ☒ Claim(s) 1-15 is/are rejected.
- 7) ☐ Claim(s) ____ is/are objected to.
- 8) ☐ Claim(s) ____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☒ The drawing(s) filed on 23 March 2004 is/are: a) ☒ accepted or b) ☐ objected to by the Examiner.
 Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
 Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
 a) ☐ All b) ☐ Some * c) ☐ None of:
 1. ☐ Certified copies of the priority documents have been received.
 2. ☐ Certified copies of the priority documents have been received in Application No. ____.
 3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).
- * See the attached detailed Office action for a list of the certified copies not received.

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims **1,3-9,11 and 13-15** are rejected under 35 U.S.C. 102(b) as being anticipated by Lee et al., U.S. Pat. Application Pub. No. **2002/0171774**.

Considering claims **1, 8,9,15**, Lee discloses a display apparatus and a tuner module mounted thereon. The display apparatus 1, as illustrated in FIG. 4, includes a front cover 10 and a rear cover 20 coupled to each other and forming a predetermined accommodating space therebetween, an LCD panel 30 having an effective surface on which a picture is displayed, a PCB supporting member 40 having a main PCB 41 and a connection port 47 and supporting LCD panel 30, and a TV tuner unit 50 detachably attached at rear cover 20 and receiving the TV video signal, transmitting the TV video signal to main PCB 41 through connection port 47 and outputting the TV video signal. Herein, "the effective surface" denotes a front surface of LCD panel 30 exposed through

Art Unit: 2622

front cover 10. (See, paragraph [0034]; Fig.4) And as shown in Figs. 5,6, 7 and 8, the TV tuner unit 50 comprises a TV tuner 51, video decoder 58, and connector 57. The TV tuner PCB 52 can be removed easily from the main PCB 41. As to the claimed blocking electromagnetic interferences, Lee specifically discloses that “when TV tuner unit 50 is inserted into tuner unit accommodating part 21, both ends of earth spring 25 contact LCD panel 30 while a portion of earth spring 25 exposed outside tuner unit accommodating part 21 contacts, as shown in FIG. 5, the earth terminal 70 of a TV tuner 51 contained within TV tuner unit 50. Thus, harmful electromagnetic waves generated from TV tuner unit 50 can be removed. [emphasis added]. Therefore, Lee discloses all claimed subject matter.

As to claims **3, 11**, Lee discloses the accommodating part 21a (Fig.9).

Considering claim **4,13**, Lee discloses a stand or a supporter 2, fig.3.

Considering claim 5, Lee discloses the rear cover 20, fig.9;

Regarding claims 6, Lee discloses stand 2, fig.3;

Regarding claims **7 and 14**, Lee discloses figs.6 and 9, for example, which illustrate the sub or tuner PCB combined or attached to the main PCB 41 to provide a convenience for mounting.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims **2,10,12** are rejected under 35 U.S.C. 103(a) as being unpatentable over Lee in view of Shatas et al., U.S. Pat. No. 5,323,298.

Considering claim **2,10,12**, although Lee does not specifically disclose a material for shielding the circuit from harmful electromagnetic waves, Lee discloses that "when TV tuner unit 50 is inserted into tuner unit accommodating part 21, both ends of earth spring 25 contact LCD panel 30 while a portion of earth spring 25 exposed outside tuner unit accommodating part 21 contacts, as shown in FIG. 5, the earth terminal 70 of a TV tuner 51 contained within TV tuner unit 50. Thus, harmful electromagnetic waves generated from TV tuner unit 50 can be removed. Nevertheless, such method of shielding the electronic circuitry from harmful electromagnetic waves, interference, or signals is notoriously well known in the display art. In this regard, for example, Shatas et al. discloses an integral enclosure and shield for EMI radiating circuitry comprising a rear cover symmetrical to said front cover and fitting within said rear opening and having second opposed side regions, each covering an interior rear portion of a respective one of said junctures, said rear cover of a material for blocking electromagnetic radiation. (See, col. 1, lines 25-38 and col. 6, lines 30-36) Therefore, it would have been obvious

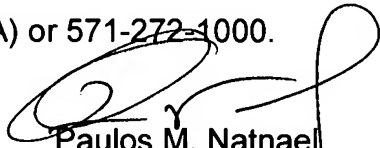

to the skilled in the art at the time the invention was made to modify the system of Lee by providing the material to protect the circuitry from harmful waves.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Paulos M. Natnael whose telephone number is (571) 272-7354. The examiner can normally be reached on 8AM-4:30 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, David Ometz can be reached on (571) 272-7593. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
